Dear Representative:

Re: Disability Community Supports Critical Provisions of Senate Bill

The following members of the Consortium for Citizens with Disabilities (CCD) strongly urge you to vote for the *Patient Protection and Affordable Care Act* (H.R. 3590). . CCD, a coalition of national consumer, service provider, and professional organizations, advocates on behalf of persons with disabilities and chronic conditions and their families.

We believe the goal of health care reform should be to assure that all Americans, including people with disabilities and chronic conditions, have access to high quality, comprehensive, affordable health care that meets their individual needs and enables them to be healthy, functional, live as independently as possible, and participate in the community. The Senate bill goes a long way toward meeting that goal and we hope that the legislative history developed during the debate and consideration of the reconciliation bill will also help to improve the legislation for individuals with disabilities and chronic conditions.

Within H.R. 3590, the following provisions stand out as particularly beneficial to the disability and chronic illness community:

- Major <u>insurance market reforms</u> such as the elimination of discrimination based on health status, a prohibition on pre-existing condition exclusions (including implementation of an immediate ban on exclusions for children), guaranteed issue and renewal requirements, and the elimination of annual and lifetime caps;
- Creation of a <u>high-risk pool</u> to provide immediate assistance to those currently uninsured with pre-existing conditions before insurance market reforms are implemented;
- Inclusion of critical services for people with disabilities in the new Health Insurance Exchange's <u>essential benefits package</u> such as rehabilitation and habilitation services and devices, mental health services, and pediatric vision and oral services;
- Inclusion of the <u>Community Living Assistance Services and Supports (CLASS)</u>
 <u>Act</u>, a new actuarially sound, premium-based, voluntary, national long term
 services insurance program to help adults with severe functional impairments to

- remain independent, employed, and a part of their communities, without having to impoverish themselves to become eligible for Medicaid;
- Inclusion of a <u>Community First Choice Option to Provide Medicaid Coverage of Community-Based Attendant Services and Supports</u> which allows states to offer such services to people otherwise eligible for Medicaid institutional services;
- Significant investments in <u>Medicaid</u> to dramatically expand eligibility;
- Substantial <u>federal subsidies</u> and out-of-pocket limits to make coverage as affordable as possible;
- New mechanisms and payment methods to <u>better coordinate chronic care for</u> people with disabilities;
- An extension of the exceptions process to the <u>Medicare therapy caps</u> on physical, occupational, and speech and language therapies;
- Requirements for the development of standards for <u>accessible diagnostic and</u> <u>other medical equipment</u>;
- Implementation of a very deliberate, <u>evidence-based approach to bundling of post-acute care</u>, which includes a requirement that the Secretary conduct the <u>Continuing Care Hospital (CCH) pilot</u>;
- Inclusion of "disability" as a subpopulation in the provisions regarding Comparative Effectiveness Research (CER); and
- Requirements that CMS <u>collect data</u> on the health care provided to people with disabilities.

On behalf of the individuals and families we represent, we urge you to support meaningful and comprehensive health reform legislation for people with disabilities and chronic conditions. Please feel free to contact any of the CCD task force co-chairs listed below with questions or requests. Thank you.

Sincerely,
